Tony Kart Australia technical support at race meetings.

The official Tony Kart Australia Race Team is always on hand to answer any technical questions for ANY pilot of a Tony Kart chassis at ANY race meeting we attend.

We offer full support as well as driver support to anyone driving one of the green machines. While we do endeavour to talk to as many Tony Kart pilots as possible during the course of a meeting, we may sometimes miss some people. We therefore ask you to seek out the Tony Kart Race Truck, anytime, so we can help you, or you may just want to chat about your next chassis choice.

Race meetings are always a busy time at the Tony Kart Truck, and sometimes you may need to be a little patient in order to speak to one of our technicians, but please do so, as it is pleasing for us to see you enjoy the performance of your Tony Kart chassis.

The answer to your questions will be answered courteously, all be it the replies will be straight to the point. In the pressure cooker environment at a major race meeting, please do not misinterpretate this as being abrupt, it is purely a time constraint issue to answer the many questions on any given race day.

Our policy is to also be polite, correct and to the point.

The Tony Kart Race Team will always share their information to any Tony Kart pilot –
No Exceptions

Thank you & Good Performances
